

# GABRIEL BAKER

Data Analyst Enthusiast | Data Analytics | Visualization

+1-(234)-555-1234 Email linkedin.com Houston, Texas

## SUMMARY

Driven data enthusiast adept at utilizing statistical techniques and SQL to turn large datasets into meaningful insights. Skilled in Python programming and data visualization tools, known for excellent problem-solving abilities. Eager to contribute to innovative projects and grow within the analytics field.

## EXPERIENCE

### Data Analysis Lead in University Research Project

Insight Analytics Lab 01/2025 - Present Virtual

- Conducted in-depth exploratory data analysis on a dataset of over 20,000 records, identifying key trends and anomalies.
- Collaborated with a team of students to build predictive models that improved forecasting accuracy by 15%.
- Developed interactive dashboards using Tableau, resulting in enhanced data communication for academic stakeholders.
- Documented methodologies for all analyses performed, ensuring reproducibility and data integrity across projects.
- Used teamwork and active listening during presentations, efficiently gathering feedback from peers and professors.

### Programming and Data Visualization Enthusiast Community Organizer

Houston Code & Data Meetup 05/2025 - 12/2025 Houston, Texas

- Organized monthly meetings for a community of 150 data and programming enthusiasts, fostering networking and learning.
- Facilitated workshops on Python and R, directly enhancing participants' skills in data manipulation and visualization.
- Employed Power BI to present data insights from survey responses, enhancing member engagement by 20%.
- Led discussions on advanced data analysis techniques, solidifying leadership and communication skills within the community.

## TRAINING / COURSES

Tableau for Advanced Data  
Visualization

Coursera, 2025

SQL for Data Science

edX, 2024

Machine Learning with Python

Coursera, 2025

## VOLUNTEERING

### Data Volunteer

Houston Food Bank

02/2025 - 08/2025

Contributed to data analysis efforts to optimize food distribution processes.

- Analyzed donation and distribution data, helping the charity improve operational efficiency by 10% last year.
- Collaborated closely with logistics teams to provide actionable insights from raw data, enhancing weekly reports.
- Supported the development of visual reports to aid decision-making processes related to food distribution trends.

## EDUCATION

### Bachelor of Science in Data Science

University of Houston

01/2022 - 01/2025 Houston, Texas

## LANGUAGES

English

Native

Spanish

Advanced

## SKILLS

SQL

Python

Tableau

R Programming

Data Cleaning

Statistical Analysis

## INTERESTS

### Big Data Analytics

Driven to explore the complexities of data and its potential to transform business operations.
